PROMPTS.md

COMPONENT COMPOSITION (app/page.tsx)

app/page.tsx → Home → <Suspense> → ListingContent

Client component. Owns all cross-component state and passes it down as props/callbacks.

lightboxIndex: number | null → Lightbox

scrolled: scrollY > 1100 → StickyNav

tourOpen: URL ?modal=PHOTO_TOUR_SCROLLABLE

PAGE CHROME

Header

static · logo, search pill, nav (no data)

StickyNav

fixed · mounts when scrolled · IntersectionObserver scroll-spy

<main> maxWidth 1200px, centered

TitleRow

title · Share / Save

Gallery

heroPhotos → onOpenLightbox(i) · onOpenTour()

TitleMeta

subtitle · guests/beds summary

GRID 1fr | 380px (anchors: #photos #amenities)

Highlights

guest-favourite badge · host row · 3 highlights

Description

translated notice · fade-clamp · show more

Sleeping

bedroom / living room cards

Amenities

top amenities · show-all modal

BookingCalendar

dual-month range picker (checkIn/checkOut props)

BookingCard

sticky · price · dates · guests

sticky right rail, ends with the calendar (closed before Reviews)

hr divider, then FULL-WIDTH SECTIONS (anchors: #reviews #location)

Reviews

leaf rating · meters · pills

LocationMap

static map · zoom UI

HostProfile

host card · co-hosts

ThingsToKnow

3-column policies

NearbyStays

scroll carousel

OVERLAYS (conditionally rendered by page.tsx)

PhotoTour

when tourOpen · thumbnail nav + scrolling room sections
opens Lightbox via onOpenLightbox(i)

Lightbox

when lightboxIndex ≠ null · prev/next · ←/→ · Esc · focus mgmt
reads photos[] · index state lives in page.tsx

DATA LAYER

lib/listing-data.ts — single source of content (no copy is hardcoded in components)

exports: listing · photos · heroPhotos · coHosts · nearbyStays

read by every section component; Gallery ← heroPhotos, PhotoTour/Lightbox ← photos, HostProfile ← coHosts, NearbyStays ← nearbyStays

Legend: pink = page root · amber = chrome / static · blue = main column sections · green = full-width sections · purple = overlays · black = data
